V. FROM THE DESK OF DIRECTOR

Acharya Harihar Regional Cancer Centre is one of the premier cancer centres of India. It caters to a sizable load to whole of eastern India. The OPD & IPD services are bursting at its seams; that speaks volumes on quality care rendered by the professionals. Keeping in view of the existing & future requirement, the government is planning a massive expansion program.

The last couple of general body meetings had raised many issues pertaining to the future of AHRCC. We have been striving since then to comply with the decisions taken in principle. In some areas, we have achieved the desired results & some issues are still pending. The significant achievements are:

1. The drug distribution through "Niramay "system started in May 2015. We are now dispensing free anticancer drugs to all our beneficiaries.
2. Odisha government under the leadership of AHRCC and guidance of Dr, Dinesh Pendarkar has started cancer care centres in seven district head quarter hospitals. Besides general cancer care, free chemotherapy administration has started in these centres under professional supervision.
3. The linear accelerator machines inaugurated by our Hon'ble Chief Minister in January. They are in continuous use since then.
4. The mandatory exemption letter from Government of India to start post graduate courses in AHRCC was received. Applications have been submitted to ministry of health for post graduate courses in Pathology & Anaesthesiology. In due course actions will be initiated to start PG courses in Surgical Oncology, Gynaecologic Oncology.
5. LINAC G+6 constructions are under process of tender. Constructions will be started very soon.
6. A skeletal 24hrs emergency service has been stared. Permission obtained for appointment of doctors on contractual basis for smooth operation.
7. The post-operative ward is in operation. The gas pipe line work is in progress. Permission obtained to appoint doctors on contract for smooth functioning of an ICU once the pipeline work is complete.
8. Computerised registration system has been started. An unique identification number is being issued to each cancer patient.
9. A proposal worth Rs 13crores has been submitted to OSMCL under EIF program.
10. The pain & palliation wing has been merged with AHRCC.

On the professional front, under the leadership of Surgical Oncology department & AHRCC, the cancer surgeons of Odisha organised the National Conference of Indian Association of Surgical Oncology (IASO NATCON 2015) in Bhubaneswar after a gap of 15years. The conference was inaugurated by Hon'ble Chief Minister of Odisha. That has sensitised the surgeons working in the field of cancer in this part of the country on newer technologies and provided a national platform to highlight their skills.

We have a brilliant workforce. They have professional skills par excellence. What they need is guidance & motivation. Periodic, structural training both inside & outside country focusing on technology transfer will transform these professional to luminaries in the field of cancer. At the same time they must get due recognition amongst their peers in terms of designations in which they are placed. This will motivate them to perform as a team & work for the institution. We are initiating structured training courses to increase the talent pool of the state.

I see a great future for the hospital. The government of India queries as regards to sanction of funds for State cancer institute have been met. We are expecting the grant any time now. With a committed government & dedicated work force there is no reason for not developing it to a major cancer centre in India.

GYNAECOLOGIC ONCOLOGY

Amongst the common cancers in India the two preventable and potentially curable cancers are Oral Cavity and Uterine Cervix Cancer. Uterine Cervix cancer ranks the second position in terms of incidence all over the country. Dept. of Gynecological Oncology deals with female cancer patients for prevention, palliation, early diagnosis and prompt adequate treatment. The main activities of this department are:

- Diagnosis and treatment of malignant cases of female genital tract.
- Diagnosis of Gynecological premalignant lesions and its proper treatment.
- Routine screening of female population for early diagnosis of cancer cervix amongst the patients attending the outdoor of the centre.
- Assisting in Mobile Cancer Detection Camps for screening of patients.
- Training of Post-graduate students, in-service doctors and Para-medical workers.
- Training in gynecologic oncology of post-PG faculties.

For diagnosis purpose cervical pap-smear-study seems beneficial in most of the cases. Besides these cervical Biopsies, endocervical curettage and endometrial histopathological studies and colposcopy are being done in suspected cases. After final diagnosis proper treatment plan is made and executed.

HEAD & NECK ONCOLOGY

Head & Neck Cancer form about 30% of all cancers. The high incidence of Oral, Laryngeal, Pharyngeal and Maxillary cancers is attributed to the habit of different forms of tobacco consumption and smoking habits. Incidence of Head & Neck cancer is at par with countries like Sri Lanka, Bangladesh, Pakistan and other South-East Countries, which is far higher than the Western World. Oral cancer tops the list of head & neck cancers. It is presumed that annually 500,000 new

cases are expected in our country. Of these five-lakh cases, about a third suffers from mouth and throat cancers.

Oral cancer is one of the 10 most common cancers of the world and the commonest in India. There is excellent evidence from many sources that approximately 90% of these cancers are due to tobacco abuse in any form and poor oral & dental hygiene. Almost 70% - 80% of the cases reported have advanced stage of cancer which is practically in Stage-III & IV. Cancers of the Thyroid gland, parotid gland and minor salivary glands are also frequently reported in this Dept. The incidence of pre-malignant lesions like leukoplakia and sub-mucous fibrosis has increased considerably. Cosmetic value being a vital factor, various re-constructive procedures is being performed by this department.

The post-graduate students, Para-medical staffs and ex-service doctors are imparted regular training programs keeping in view the early detection, prevention and treatment of Head & Neck cancers as the main theme.

MEDICAL ONCOLOGY

This Dept. started functioning independently since November, 1987. It has an important role in the management of cancer cases. The main function of this division is to provide treatment care for the patients suffering from wide range of malignant neoplasms especially for haematological malignancies, lymphoma and solid neoplasms by chemotherapy as primary mode, concurrent mode (CT /RT), neo-adjuvant before RT/Surgery or adjuvant mode following RT/Surgery.

Department of Medical Oncology has a Paediatric Oncology Wing for paediatric patients coming to the centre. The ten bedded Sovan Bhuyan Memorial Day Care Unit is serving under the department for the patients receiving chemotherapy.

MEDICAL PHYSICS

The Department of Medical Physics ensures implementation of the provisions of the Radiation Protection Rules (RPR)-2004 enforced by the Atomic Energy Regulatory Board (AERB), Government of India with the following responsibilities :

- Evaluation and optimization of Radiation treatment planning for cancer patients undergoing radiation therapy.
- Performing radiation dosimetry, periodic calibrations, quality assurance (QA) testing traceable to national standards laboratory and maintenance of all the radio-therapeutic and radio-diagnostic equipments/ machines.
- Observing radiation safety for the radiation workers, staff members, patients and public in the Departments of Radiation Oncology, Radiodiagnosis, Nuclear Medicine and Medical Physics.
- Participating in various research and developmental activities of the centre.
- Facility design and Planning for commissioning of new radiation installations and decommissioning of old installations in accordance with the requirements of the installation that meets the regulatory stipulations of radiation protection and safety.
- Preparations of specifications for treatment and dosimetric equipment;
- Acceptance testing, commissioning and quality assurance (including calibration) of radiation facilities.
- Measurement, analysis and tabulation of beam data for clinical use.
- Development of QA protocols and procedures in radiation therapy regarding delivery of radiation treatment, radiation safety and control and regulatory compliance.
- Supervision of radiation therapy equipment servicing and maintenance of records.
- Teaching Radiation Physics to the PG-students for MD (Radiation Oncology) degree and the DMRT (Dip. in Medical Radiation Technology) students of SCB Medical College, Cuttack.

NUCLEAR MEDICINE

Nuclear Medicine is a branch of Medicine which uses radioisotopes for the diagnosis and treatment of various diseases. It is based on the tracer principle i.e. Radioisotopes is tagged to a compound which has affinity for a particular organ so that when administered it goes to the organ for which it is meant for depending upon the functional integrity of that particular organ. This uptake can be used to assess the morphology and function of any organ.

PATHOLOGY

The Department of Pathology acts as the gateway to the cancer centre. Its role on the diagnosis of cancer, subjects the patients to various treatment modalities and follow-up. It has several sections like Histopathology, Cytology, Hematology, Clinical Pathology, Biochemical Pathology and Microbiology. Besides the hospital laboratory services its staff participate in various Cancer Detection Camps.

This department is facilitated with the studies of Cytology, Histology, Biochemical, Hematology, Clinical pathology, Bone-marrow basing on Standard treatment protocols.

RADIOTHERAPY

This department treats about 200 patient's daily using telecobalt therapy and HDR brachytherapy. About 65% of all cancer patients attending this institute avail radiation therapy during their course of treatment. External Beam therapy is delivered by one telecobalt units (Theratron-780C) from 8:00 AM to late night in three shifts on all working days. Multiple-fields, wedge, block and tangential fields at 80cm SSD are practiced as required. Now the department is well equipped with Linear Accelerator and CT-Simulator. PG-studies in radiotherapy leading to MD (RT) is available in the institute since 1973. Five PG students admit every year for their MD degree. At present, fifteen PG- students are continuing their post-graduate studies in this institute. Post graduate seminars are organized twice a month.

SURGICAL ONCOLOGY

Surgical oncology is one of the important departments of the cancer centre. Usually all the new patients coming to the center are first seen in the Surgical Oncology OPD and after getting the tissue or cytological diagnosis and evaluation for operability both clinically and radiologically, those patients are taken for surgical admission and operations. Inoperable cases detected either clinically or radiologically are referred for other modality of treatments like chemotherapy and or radiotherapy.

Modified radical mastectomy, Breast conservation surgeries, radical gastric resections, Abdomino Perineal Resection of rectal cancers are few of those surgeries being done routinely. Radical as well as conservative surgeries for cancer penis are also done frequently. Many a times palliative and bypass surgeries are being done to alleviate pain and agony, Oesophago-gastrectomy, Whipples procedures are been done less frequently. Wide local excision of soft tissue cancers are also being done in routine basis along with Reconstructive procedures. One reconstructive surgeon is working full time but on deputation basis from civil hospital. A fulltime faculty in plastic and reconstructive surgery is badly needed for this department. Post-graduate students from the department of Surgery, SCB Medical College, Cuttack are undertaking training on rotation, They are getting much better exposure and benefit as more than 50% of cases in their examination period are oncology subject. We need to get more and more support from the HOD Surgery from SCB Medical college in this regard posting them on rotation and also for at least 3 months instead of 1 month. Surgeons from peripheral health services are also undergoing re-orientation training in surgical technique on rotation basis. This reorientation program for the peripheral surgeons needs to be on a more regular

basis which is not the fact now. The departmental seminar is being conducted regularly. The faculties have also delivered many guest lecturers, presented papers in conferences and taken part in various symposia and workshops. Faculties have regularly taking part in early cancer detection and educational programs joining the cancer control camps and various awareness programs.

C. MAJOR ACTIVITIES

HBCR-POCSS

Hospital Based Cancer Registry & Patterns of Care & Survival Studies in Cancer Cervix, Cancer Breast & Head & Neck Cancers Under the National Cancer Registry Programme (HBCR-POCSS)

The broad and overall objectives of a Hospital Based Cancer Registry vis-à-vis the present HBCR-POCSS are outlined below :

1. Assess Patient Care;
2. Participate in Clinical Research to Evaluate Therapy;
3. Provide an idea of the patterns of cancer in the area;
4. Help plan hospital facilities;
5. Contribute to active follow-up of the cancer patient;
6. Describe length and quality of survival in relation to anatomical site, clinical stage and aspects of types of treatment;
7. Contribute to the Population Based Cancer Registries (PBCRs) in the given area;
8. Undertake epidemiological research through short-term case control studies;
9. Show time trends in proportion of early to late stages at the time of diagnosis;
10. Help assess quality of hospital care and cancer services in covered area.

PREVENTION OF CANCER

"Catch them early, treat them adequately and get a cure" is the motto of cancer control programme. Luckily in our state the commonest top three cancers are 1. Oral, 2. Cervix, 3. Breast cancers which are again can be detected at very early stage and can be prevented by simple awareness amongst the people as well as medical personnel at the periphery. Cancer Awareness Programmes have been regularly under taken by the centre in the following manner.

- Awareness & Detection camps at the remote rural areas of the state.
- Conducting seminars & meeting in AHRCC.
- Involvement of NGOs and voluntary organizations in the awareness programme.
- Faculty participation in television & radio programme as experts.

HELP DESKS

- Odisha State Treatment Fund Cell.
- Biju Krushak Kalyan Yojana/Rastriya Swasthya Bima Yojana Cell.
- Counseling service by Non Communicable Disease Cell for treatment, awareness and prevention of cancer.
- Psychological Counseling by Mental Health Institute, SCB Medical College & Hospital for patients & attendants.

AUDITOR'S REPORT

To
The Director,
ACHARYA HARIHAR REGIONAL CENTRE FOR
CANCER RESEARCH & TREATEMENT SOCIETY,
CUTTACK – 753007

1. We have examined the attached Balance Sheet of **"Acharya Harihar Regional Centre for Cancer Research & Treatment Society, Cuttack ,Odisha"** as at 31st March 2015 and also the annexed Income & Expenditure Account and Receipts & Payments Account for the year ending on that date. These financial statements are the responsibility of the management. Our responsibility is to express opinion on these financial statements based on our audit.

2. We have conducted the audit in accordance with auditing standards generally accepted in India. These Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement .An audit includes examining, on a test basis, evidence in supporting the amounts and disclosures in the financial statements. An audit also includes assessing the amounting principles used significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

3. We further report that :

   (I) We have obtained all the information and explanation ,which to the best of our knowledge and belief were necessary for the purposes of the audit.

   (II) The Balance Sheet and Income & Expenditure account dealt with by the report are in agreement with the books of account.

   (III) In our opinion and to the best of our information and according to information given to us, the said accounts do not give a true and fair view:

   a) In the case of the Balance Sheet, of the state of affairs of the above named society as at 31st. March, 2015 and
   b) In the case of the Income & Expenditure Account, of the excess of income over expenditure for its accounting ending on 31st. March, 2015.
