## V. FROM THE DESK OF DIRECTOR

AHRCC is committed to excellence in patient care, create talent pool in cancer care for the state, decentralise certain aspects of treatment in the form of task shifting the chemotherapy administration & palliative care to district level, and create awareness in cancer prevention & early detection. Last year has been quite productive & in away a watershed in the history of AHRCC.

The significant achievements are :

1. 50% increase in the number of patients attending AHRCC in 2017-18 in comparison to the last year. The increase may be partly due to improvement in registration.
2. 35% increase in the number of major operations last year. Overall 42% increase in the number of major & minor operations taken together.
3. 23% increase in pathologic investigations
4. More than 30,000 cycles of chemotherapy have been administered.
5. LOP received from Government of India to start super-speciality courses in AHRCC from 2017-18. Two seats each in M.Ch in Surgical Oncology and Gynaecologic Oncology.
6. Applied for opening of 20 seats in DMLT course
7. Our centre has been chosen as a centre for telemedicine network
8. SCI grant partially released, matching grant from Govt. of Odisha released.
9. Emergency service fully functional.
10. Palliative care initiated in the emergency ward with a regular doctor & dedicated staff. AHRCC is the nodal centre for palliative care at the district level. First batch of doctors & nurses have been trained at Karunashraya in Bangalore after sensitization program in AHRCC. Jivdaya foundation, an US based NGO has also promised to provide one palliative care nurse & DEO to train manpower in AHRCC & help in starting home based palliative care.
11. Central gas pipeline supply service has been made functional.
12. Construction over LINAC building started.
13. Bhabatron cobalt source replacement approved.
14. Sensitization course for pre-accreditation level for NABH undertaken

The AHRCC team is actively involved in the developmental activities. We are working to computerise our core functions and digitalise the patient record system. National cancer grid has provided support for e- library. The face of AHRCC is fast changing. If this pace of development continues, very soon it will be a leading centre in comprehensive cancer care in the country.

**GYNACOLOGIC ONCOLOGY**

Amongst the common cancers in India the two preventable and potentially curable cancers are Oral Cavity and Uterine Cervix Cancer. Uterine Cervix cancer ranks the second position in terms of incidence all over the country. Dept. of Gynecological Oncology deals with female cancer patients for prevention, palliation, early diagnosis

and prompt adequate treatment. Departmental library has with more than 100 books and periodicals for education and research purpose. The main activities of this department are:

- Diagnosis and treatment of malignant cases of female genital tract.
- Diagnosis of Gynecological premalignant lesions and its proper treatment.
- Routine screening of female population for early diagnosis of cancer cervix amongst the patients attending the outdoor of the centre.
- Assisting in Mobile Cancer Detection Camps for screening of patients.
- Training of Post-graduate students, in-service doctors and Para-medical workers.
- Training in gynecologic oncology of post-PG faculties.

For diagnosis purpose cervical pap-smear-study seems beneficial in most of the cases. Besides these cervical Biopsies, endocervical curettage and endometrial histopathological studies and colposcopy are being done in suspected cases. After final diagnosis proper treatment plan is made and executed.

**Problems and prospective**

- Deficiency of indoor beds
- Need ICU backup with manpower
- Lack of JRs and inadequate SRs
- In house Blood Bank facility
- Tumour markers and IHC facility need to be enhanced
- Facility for Imaging and preoperative cardiac evaluation
- Interdepartmental consultation facility with SCB

### HEAD & NECK ONCOLOGY

Oral cancer is one of the 10 most common cancers of the world and the commonest in India. There is excellent evidence from many sources that approximately 90% of these cancers are due to tobacco abuse in any form and poor oral & dental hygiene. Almost 70% - 80% of the cases reported have advanced stage of cancer which is practically in Stage-III & IV. Cancers of the Thyroid gland, parotid gland and minor salivary glands are also frequently reported in this Dept. The incidence of pre-malignant lesions like leukoplakia and sub-mucous fibrosis has increased considerably. Cosmetic value being a vital factor, various reconstructive procedures is being performed by this department.

The post-graduate students, Para-medical staffs and ex-service doctors are imparted regular training programs keeping in view the early detection, prevention and treatment of Head & Neck cancers as the main theme.

### MEDICAL ONCOLOGY

Medical oncology department has an important role in the management of cancer cases. The main function of this division is to provide treatment care for the patients suffering from wide range of malignant neoplasms especially for haematological malignancies, lymphoma and solid neoplasms by chemotherapy as primary mode, concurrent mode (CT/RT), neo-adjuvant before RT/Surgery or adjuvant mode following RT/Surgery.

Department of Medical Oncology has a Paediatric Oncology Wing for paediatric patients coming to the centre. The ten bedded Sovan Bhuyan Memorial Day Care Unit is serving under the department for the patients receiving chemotherapy.

## MEDICAL PHYSICS

The Department of Medical Physics ensures implementation of the provisions of the Radiation Protection Rules (RPR)-2004 enforced by the Atomic Energy Regulatory Board (AERB), Government of India with the following responsibilities:

- Evaluation and optimization of Radiation treatment planning for cancer patients undergoing radiation therapy.
- Performing radiation dosimetry, periodic calibrations, quality assurance (QA) testing traceable to national standards laboratory and maintenance of all the radio-therapeutic and radio-diagnostic equipments/ machines.
- Observing radiation safety for the radiation workers, staff members, patients and public in the Departments of Radiation Oncology, Radiodiagnosis, Nuclear Medicine and Medical Physics.
- Participating in various research and developmental activities of the centre.
- Facility design and Planning for commissioning of new radiation installations and decommissioning of old installations in accordance with the requirements of the installation that meets the regulatory stipulations of radiation protection and safety.
- Preparations of specifications for treatment and dosimetric equipment;
- Acceptance testing, commissioning and quality assurance (including calibration) of radiation facilities.
- Measurement, analysis and tabulation of beam data for clinical use.
- Development of QA protocols and procedures in radiation therapy regarding delivery of radiation treatment, radiation safety and control and regulatory compliance.
- Supervision of radiation therapy equipment servicing and maintenance of records.
- Teaching Radiation Physics to the PG-students for MD (Radiation Oncology) degree and the DMRT (Dip. in Medical Radiation Technology) students of SCB Medical College, Cuttack

## **PATHOLOGY**

The Department of Pathology acts as the gateway to the cancer centre. Its role on the diagnosis of cancer, subjects the patients to various treatment modalities and follow-up. It has several sections like Histopathology, Cytology, Hematology, Clinical Pathology, Biochemical Pathology and Microbiology. Besides the hospital laboratory services its staff participate in various Cancer Detection Camps.

This department is facilitated with the studies of Cytology, Histology, Biochemical, Hematology, Clinical pathology, Bone-marrow basing on Standard treatment protocols.

## **RADIOTHERAPY**

This department treats about 200 patient's daily using telecobalt therapy and HDR brachytherapy. About 65% of all cancer patients attending this institute avail radiation therapy during their course of treatment. External Beam therapy is delivered by one telecobalt units (Theratron-780C) from 8:00 AM to late night in three shifts on all working days. Multiple-fields, wedge, block and tangential fields at 80cm SSD are practiced as required. Now the department is well equipped with Linear Accelerator and CT-Simulator. More than thousand patients were treated successfully with most sophisticated treatment modalities like VMAT and IMRT. PG-studies in radiotherapy leading to MD (RT) is available in the institute since 1973. Six PG students admit every year for their MD degree. At present, sixteen PG-students are continuing their post-graduate studies in this institute. Post graduate seminars are organized twice a month.

**SURGICAL ONCOLOGY**

Surgical oncology is one of the important departments of the cancer centre. Usually all the new patients coming to the center are first seen in the Surgical Oncology OPD and after getting the tissue or cytological diagnosis and evaluation for operability both clinically and radiologically, those patients are taken for surgical admission and operations. Inoperable cases detected either

clinically or radiologically are referred for other modality of treatments like chemotherapy and or radiotherapy.

Modified radical mastectomy, Breast conservation surgeries, radical gastric resections, Abdomino Perineal Resection of rectal cancers are few of those surgeries being done routinely. Radical as well as conservative surgeries for cancer penis are also done frequently. Many a times palliative and bypass surgeries are being done to alleviate pain and agony, Oesophago-gastrectomy, Whipples procedures are been done less frequently. Wide local excision of soft tissue cancers are also being done in routine basis along with Reconstructive procedures. One reconstructive surgeon is working full time but on deputation basis from civil hospital. A fulltime faculty in plastic and reconstructive surgery is badly needed for this department. Post-graduate students from the department of Surgery, SCB Medical College, Cuttack are undertaking training on rotation, They are getting much better exposure and benefit as more than 50% of cases in their examination period are oncology subject. We need to get more and more support from the HOD Surgery from SCB Medical college in this regard posting them on rotation and also for at least 3 months instead of 1 month. Surgeons from peripheral health services are also undergoing re-orientation training in surgical technique on rotation basis. This reorientation program for the peripheral surgeons needs to be on a more regular basis which is not the fact now. The departmental seminar is being conducted regularly. The faculties have also delivered many guest lecturers, presented papers in conferences and taken part in various symposia and workshops. Faculties have regularly taking part in early cancer detection and educational programs joining the cancer control camps and various awareness programs.

## Hospital Based Cancer Registry &amp; Patterns of Care &amp; Survival Studies in Cancer Cervix, Cancer Breast &amp; Head &amp; Neck Cancers Under the National Cancer Registry Programme (HBCR-POCSS)

Dr. D. K. Agarwalla Assoc. Professor	Principal Investigator
Dr. P. C. Pathy Assoc. Professor	Co-Principal Investigator
Dr. J. Mohapatra Asst. Professor	Faculty-in-charge
Dr. S. K. Samantara Asst. Professor	Faculty-in-charge

The broad and overall objectives of a Hospital Based Cancer Registry vis-à-vis the present HBCR-POCSS are outlined below:

1. Assess Patient Care;
2. Participate in Clinical Research to Evaluate Therapy;
3. Provide an idea of the patterns of cancer in the area;
4. Help plan hospital facilities;

5. Contribute to active follow-up of the cancer patient;
6. Describe length and quality of survival in relation to anatomical site, clinical stage and aspects of types of treatment;
7. Contribute to the Population Based Cancer Registries (PBCRs) in the given area;
8. Undertake epidemiological research through short-term case control studies;
9. Show time trends in proportion of early to late stages at the time of diagnosis;
10. Help assess quality of hospital care and cancer services in covered area.

### AUDITOR'S REPORT

To  
The Director,  
ACHARYA HARIHAR REGIONAL CENTRE FOR  
CANCER RESEARCH & TREATMENT SOCIETY,  
CUTTACK - 753007

1. We have examined the attached Balance Sheet of "Acharya Harihar Regional Centre for Cancer Research & Treatment Society, Cuttack, Odisha" as at 31<sup>st</sup> March 2017 and also the annexed Income & Expenditure Account and Receipts & Payments Account for the year ending on that date. These financial statements are the responsibility of the management. Our responsibility is to express opinion on these financial statements based on our audit.
2. We have conducted the audit in accordance with auditing standards generally accepted in India. These Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence in supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
3. We further report that
  - (I) We have obtained all the information and explanation, which to the best of our knowledge and belief were necessary for the purposes of the audit.
  - (II) The Balance Sheet and Income & Expenditure account dealt with by the report are in agreement with the books of account.
  - (III) In our opinion and to the best of our information and according to information given to us, the said accounts does give a true and fair view:
    - a) In the case of the Balance Sheet, of the state of affairs of the above named society as at 31<sup>st</sup> March, 2017 and
    - b) In the case of the Income & Expenditure Account, of the excess of income over expenditure for its accounting ending on 31<sup>st</sup> March, 2017.
